

LARGE RESIN DISCS - For Glass & Metallography

KGS Telum® CH

KGS Telum® CH

This product is a hard resin pellet shaped like a cross. The open pattern and thick resin pellet give many leading edges and open channels for rapid removal of the ground material.

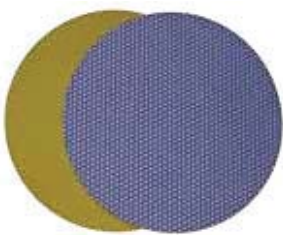

KGS Swiflex® SDA

This thin resin product is a Structured Diamond Abrasive. Although much thinner layer of resin than the KGS Telum® CH - it can deliver rapid polishing at an economical cost. This product is more suitable for small part grinding & polishing.

Double Disc Grinding

KGS DIAMOND can also supply product for rapid grinding and polishing on Precision Double Disc Grinders.

Expertise, learnt from metallography, has enabled the transition to much larger disc grinding applications. Please contact our Application Engineers to learn more.

KGS Telum® CH Disc SA ø250mm

Grit		Code
60	- 250µm	1024.1600121
120	- 125µm	1024.1600122
200	- 74µm	1024.1600123
400	- 40µm	1024.1600124
800	- 20µm	1024.1600125
1500	- 9µm	1024.1600126
3000	- 3µm	1024.1600127

KGS Telum® CH Disc SA ø300mm

Grit		Code
60	- 250µm	1024.1600221
120	- 125µm	1024.1600222
200	- 74µm	1024.1600223
400	- 40µm	1024.1600224
800	- 20µm	1024.1600225
1500	- 9µm	1024.1600226
3000	- 3µm	1024.1600227

KGS Telum® CH Disc MAGN ø300mm

Grit		Code
